Summary

Mulesoft Developer with 4 years of experience and a proven track record in integration projects. Strong knowledge of Mulesoft Anypoint Platform, Data Weave 2.0 and API management with a significant achievement of optimizing application performance.

Skills

Anypoint Platform: API Manager, Anypoint Design Center, Anypoint Partner Manager, Cloudhub 1.0 & 2.0

Systems: MuleSoft, Salesforce, Microsoft SQL, Oracle Database, Postman

Scripting: Python, Dataweave 2.0

Connectors: SFTP/FTP, Salesforce, Outlook, VM Queues, Anypoint MQ, Email, File, Object Store

Certifications

Certified

[Link -> Certifications.git](#)

- MuleSoft Certified Developer - Level 1
- MuleSoft Certified Developer - Level 2
- MuleSoft Certified Integration Associate
- Salesforce Platform Developer I
- Salesforce Platform Developer II
- Salesforce Certified Platform Foundation

Employment History

NTT DATA Services

Noida, UP

Digital Technology Analyst

Nov 2023 - Present

- Architected and deployed highly scalable API-led integration solutions (System, Process, Experience layers) on the Anypoint Platform, driving high reusability and loose coupling across the enterprise.
- Designed robust RAML-based REST APIs using reusable traits and resource types, while enforcing strict governance and security via API Manager (OAuth 2.0, Client ID Enforcement, Rate Limiting, SLA tiers).
- Engineered seamless, enterprise-grade data flows across heterogeneous ecosystems, synchronizing bulk and transactional data between Salesforce and Oracle.
- Led end-to-end B2B/EDI integrations utilizing Anypoint Partner Manager, streamlining partner onboarding and orchestrating complex message workflows with external systems.
- Built resilient, event-driven architectures utilizing Anypoint MQ, ActiveMQ, and Object Store v2, implementing circuit breaker patterns, DLQs, and idempotent processing to guarantee message reliability.
- Optimized high-volume data pipelines using Mule Batch Processing, leveraging parallel execution and custom record-level error handling to maximize throughput for massive datasets.
- Implemented complex integrations spanning REST utilizing advanced DataWeave for intricate schema mapping, data transformation, and query optimization.
- Managed API lifecycles and CI/CD deployments across CloudHub 1.0 and 2.0 (Java 17, Mule Runtime 4.9), while driving system stability through proactive monitoring, correlation ID tracking, and deep Root Cause Analysis (RCA).
- Authored comprehensive MUnit test suites with advanced mocking, spies, and assertions to validate success and failure scenarios, ensuring exceptional code coverage and deployment confidence.

Apisero.Inc

Software Engineer

Noida, UP
June 2022 - Nov 2023

- Engineered asynchronous and event-driven architectures utilizing Salesforce Platform Events and Persistent VM Queues, enabling near real-time data flow while efficiently managing API limits and large datasets.
- Designed comprehensive, fault-tolerant error handling and retry frameworks leveraging ActiveMQ, custom error typing, and centralized logging to maximize system observability and guarantee reliable message processing.
- Integrated complex, heterogeneous systems utilizing REST, SQL mapping seamlessly handling authentication, security, and schema transformation.
- Extended native platform capabilities by developing custom utilities and proof-of-concepts, including large JSON/XML parsing and custom enhancements using the MuleSoft Java SDK and advanced DataWeave.
- Designed comprehensive API specifications utilizing RAML 1.0 and validated integration flows through rigorous MUnit testing

Education

PSIT College Of Engineering
Bachelor of Technology, Computer Science

Kanpur, UP
Aug 2018 – June 2022

New Standard Public School
Intermediate, Science

Raebareli, UP
Apr 2017 – Mar 2018
